Product highlights

5 megapixel snapshots

The technology enables 5 MP for photos and the quality is high enough for printing poster-sized images in high-resolution. With the special software enhancement you get even 2 MP for interpolated video streaming.

60 frames per second video

Create natural-looking, full motion video at 60 frames per second. It's ideal for video-chatting with friends or high-quality home monitoring.

5x digital zoom

Zoom in and out to get the perfect framing for any image. You control the zoom entirely via the onscreen interface while you're looking at the image so you can adjust it perfectly.

Wide-angle lens

The wide-angle high quality glass lens gives you a bigger field of view. The wide-angle lens operates in the same way as a wide-angle photography lens and it gets more people in the video frame without any loss in video quality.

Automatic face tracking

The state-of-the-art camera software automatically detects your face and moves the lens to follow you as you move. You stay in the center of the image even if you move during a video conference. It gives you the freedom to express yourself and converse naturally.

Directional microphone

The directional microphone focuses in on your voice so you can talk naturally and don't have to move closer to the microphone to be heard. This automatically cuts down on background noise and gives a more natural sound.

Installation manager

Install your webcam in seconds with the handy Installation Manager. Just follow the easy, step by step instructions and you'll have the webcam set up to match your computer perfectly.

Compatible with all services

The webcam and its software have been designed with all instant messaging services in mind. Add video to Skype, Windows Live Messenger, Yahoo! Messenger, AOL Instant Messenger and other services.

Stable mount

The multifunctional stand makes it easy for you to mount the webcam on any monitor, laptop, notebook or flat surface.
